

BIOCHEM CLEAN FORCE DEGREASER

product for professional use

Publication date: 03-04-2012 Edition n°:01

Description

BIOCHEM CLEAN FORCE is a concentrated ECOLOGICAL, low-foaming degreaser with powerful solubilising action for all types of greasy and oily dirt. **BIOCHEM CLEAN FORCE** complies with environmental requirements for biodegradability, ecotoxicity and efficiency set forth by the EU ECOLABEL. (EU Directive 2005/344/EC).

Applications

Due to its unique composition, **BIOCHEM CLEAN FORCE** is ideal for use on hard, water-resistant surfaces such as kitchens, floors, tiles, extractor fans, industrial floors, garages, etc.

Do not use on surfaces that are sensitive to alkaline products. Perform a patch test on a hidden surface to ensure the material is compatible before use.

How to use

Spray on: Add the appropriate amount to a spray bottle and fill to the top with water. Spray onto a cloth or directly on the surface to be cleaned and then dry with a clean cloth. On stubborn dirt, let the degreaser soak in and then wipe off with a moist cloth.

Bucket: Add the appropriate amount depending on the dirt to be removed and apply to the surface using a mop, cloth or sponge. You do not need to rinse if you only use a small amount.

Floor cleaning machines: Due to its low-foaming properties, it is suitable for floor cleaning/vacuuming machines.

PRECAUTIONS: Do not use on materials that are sensitive to water or to alkaline products (aluminium, wood, linoleum, etc.). Perform a patch test on a hidden surface to ensure the material is resistant before use.

Dosage

To clean lightly dirty surfaces: from 1 to 10 ml (0.1 to 1%) per litre of water.

To clean moderately dirty surfaces: from 10 to 50 ml (1 to 5%) per litre of water.

To clean heavily dirty surfaces: from 50 to 100 ml (5 to 10%) per litre of water.

IMPORTANT: Using the appropriate dosage will save money and reduce its impact on the environment.

Technical specifications

Physical state: Pale yellow liquid, lightly scented

pH (100%): 13,0 ± 0,5

Density at 20°C: 1.03 g/cm³

Solubility in water: Soluble at any proportion

This information relates to the standard values for the product and should not be considered as a product specification.

Safety and hygiene

- Substances that contribute to the classification: 2- aminoethanol.
- R35 Causes severe burns.
- S2 Keep out of the reach of children
- S26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- S36/37/39 Wear suitable protective clothing, gloves and eye/face protection.
- S45 In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
- S49 Keep only in the original container.
- S50 Do not mix different cleaners.
- Do not ingest.
- Full information on how to handle and discard the product is supplied on a separate Safety Data Sheet.
- In case of an accident, contact the Medical Service of Toxicological Information at Tel.: +34 915 620 420.
